Lisa gave away 60 balloons everyday during the month of July (31 days). She still had 132 balloons left. How many did she start off with?

Answer: Let  $x$  = starting number of balloons

$$x \text{ balloons} - 31 \text{ days} \left( 60 \frac{\text{balloons}}{\text{day}} \right) = 132 \text{ balloons}$$

$$x - 1860 = 132$$

$$x - 1860 + 1860 = 132 + 1860$$

$$x = 1992 \text{ balloons}$$
